PROFILE SUMMARY

Technical Consultant with 3+ years of experience in supply chain analytics, API/EDI integrations, and large-scale workflow automation on Blue Yonder LCT. Proven track record of reducing manual effort, improving data accuracy, and building production-grade analytics solutions using Python, SQL, and Power BI.

EXPERIENCE

Blue Yonder — LCT Technical Consultant

March 2023 – Present

- Led implementation of Order Collaboration (P2I), Invoice, and Change Request workflows, reducing process failures by ~25% through optimized state-machine logic (YAML)
- Improved PTA accuracy from ~60% to ~95% by identifying data inconsistencies, fixing integration gaps, and stabilizing end-to-end data pipelines across supply chain systems
- Resolved 80+ ServiceNow change requests, improving system stability and reducing recurring production defects by ~30%
- Designed and implemented API & EDI integrations for 10+ carriers, leading end-to-end carrier onboarding, resolving complex mapping and transformation issues, and improving data accuracy and consistency across shipment workflows, reducing integration failures and enhancing system reliability
- Automated onboarding of 100+ users using Python-based workflows (RBAC, policy groups), eliminating manual provisioning effort
- Developed a Python-based data purging framework for orders, deliveries, shipments, and invoices, reducing manual cleanup effort by ~70%
- Designed SAP–LCT integration to automate delivery schedule deletion, saving 15+ hours/week of manual effort
- Developed Power BI dashboards (PTA vs ATA accuracy, carrier scorecards) with dynamic filtering and calculated metrics (DAX) to analyze carrier and route performance, enabling real-time monitoring, improving delivery accuracy visibility, and driving data-driven operational decisions
- Developed optimized SQL queries using joins, aggregations to analyze large-scale shipment and integration datasets, enabling faster root cause analysis, improving debugging efficiency, and reducing issue resolution time by ~25%
- Resolved 100+ production incidents and trained end users, improving platform adoption and reducing support dependency
- Developed an AI-driven reporting agent using Python, automating data extraction (DB + UI), root cause analysis, and report distribution via email, reducing manual reporting effort from ~4 hours/day to near zero.

EDUCATION

Swarnandhra Engineering College

Bachelor of Technology(B.Tech) in Electronics and Communication Engineering

Narsapur, AP

2018 - 2022

TECHNICAL SKILLS

Tech : Java, Python, SQL, Data Analysis, Automation, API Integration, EDI

Tools : Power BI, Streamlit, Excel, ServiceNow, Blue Yonder LCT, FourKites, JIRA, Confluence

Domain : Supply Chain Analytics, Shipment Tracking, Workflow Automation, KPI Monitoring, Logistics Operations

ACHIEVEMENTS

- Awarded “Pillar Award” at Blue Yonder for delivering high-impact automation solutions reducing manual effort by ~70%
- Recognized for building AI-driven reporting automation, eliminating ~4 hours/day of manual work
- Delivered 10+ successful carrier integrations, improving data visibility and operational efficiency
- Key contributor in reducing production defects and improving system reliability across workflows

PROJECTS

Shipment Analytics Dashboard (Streamlit)

[Source Code](#)

- Built a production-ready dashboard analysing 900+ shipments to identify delay patterns and carrier risks
- Implemented KPI tracking (accuracy %, delay, volume) for real-time supply chain monitoring
- Applied IQR & Z-score anomaly detection to identify high-risk routes and carriers
- Designed advanced filtering (Carrier, POL, POD) enabling granular analysis
- Deployed live on Streamlit Cloud, eliminating manual reporting dependency
